

Converting measurements by dividing

Learning Objective: To convert a range of measurements through division.

Task: Convert the measurements by dividing by 1000.

Flour

2000 g

Kilograms:

Raisins

5500 g

Kilograms:

Sugar

1500 g

Kilograms:

Beans

1000 g

Kilograms:

Cola

1250 ml

Litres:

Apple Juice

1500 ml

Litres:

Water

1000 ml

Litres:

Milk

2750 ml

Litres:

Task: Convert the lengths to the new measurements in the table.

Millimetres (mm)	Centimetres (cm)
60 mm	
34.5 mm	
80.2 mm	

Centimetres (cm)	Metres (m)
500 cm	
707 cm	
201 cm	

Metres (m)	Kilometres (km)
2000 m	
7300 m	
8200 m
