

Converting measurements by dividing

Learning Objective: To convert a range of measurements through division.

Task: Convert the measurements by dividing by 1000.

Flour

5000 g

Kilograms:

Raisins

7000 g

Kilograms:

Sugar

8500 g

Kilograms:

Beans

2000 g

Kilograms:

Cola

1500 ml

Litres:

Apple Juice

3000 ml

Litres:

Water

4000 ml

Litres:

Milk

1000 ml

Litres:

Task: Convert the lengths to the new measurements in the table.

Millimetres (mm)	Centimetres (cm)
30 mm	
59 mm	
82 mm	

Centimetres (cm)	Metres (m)
700 cm	
400 cm	
150 cm	

Metres (m)	Kilometres (km)
9000 m	
2500 m	
4200 m
