

Converting measurements by dividing

Learning Objective: To convert a range of measurements through division.

Task: Convert the measurements by dividing by 1000.

Flour

7000 g

Kilograms:

Raisins

5000 g

Kilograms:

Sugar

6000 g

Kilograms:

Beans

3000 g

Kilograms:

Cola

4000 ml

Litres:

Apple Juice

1000 ml

Litres:

Water

3000 ml

Litres:

Milk

2000 ml

Litres:

Task: Convert the lengths to the new measurements in the table.

Millimetres (mm)	Centimetres (cm)
60 mm	
30 mm	
90 mm	

Centimetres (cm)	Metres (m)
400 cm	
700 cm	
200 cm	

Metres (m)	Kilometres (km)
2000 m	
8000 m	
9000 m
