

Kilometres (km) to Meters (m)

Learning objective: To convert kilometres into meters.

Task: John made six journeys around his community. Work out the number of meters he travelled by changing the kilometres in each question to meters.

- John travelled 8 km from Gynn Terrace to Rose Street. How many meters did he travel?
- Then, John travelled from Rose Street to Cooper Street. This journey was 1 km. What is this in meters?
- What is 4 km in meters? This is the distance travelled from Cooper Street to Dan's House.
- From Dan's house, John travelled to the Twinkl Mart. This journey was 2 km long. What is this in meters?
- What is 6 km in meters? This is the distance John travelled from Twinkl Mart to Brooke Park?
- To end his journey, John travelled to the Pizza Shop from Brooke Park. This journey was 9 km. What is this journey in meters?
