

Amelie's action plan

Commented [NS1]: Super ECO action plan. You are the first person to send me your plan. AMAZING

Target	How will we do it?	How will we measure progress? (Monitoring)	What difference have we made? (Evaluation)
Save household energy	We are going to try and switch off lights in rooms that are not being used. We are going to try and remember to	We will all check that we are carrying all of these things out.	After a week, we have all been switching the lights off and also making sure we switch the wall sockets

	switch off electrical items when they are not being used.		off after using them.
Try and reduce food waste.	We already plan our weekly meals in advance, we are already good at this.	We will measure how many food waste bags we put out for collection.	We haven't reduced our food waste as we are already good at using and eating the food that we buy which means, we have less waste.

Reusing paper.	We are going to try and reuse paper and create a scrap box.	We will check that the box is being used before paper is placed in the green recycling bag.	We have started to reuse paper which has reduced slightly the paper that we use and also recycle.
